1 Installation of Carbon Calculator Software and Database

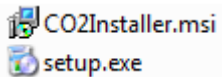

This manual assumes that the Carbon Calculator software has not previously been installed on your PC.

1.1 Locate Installation File

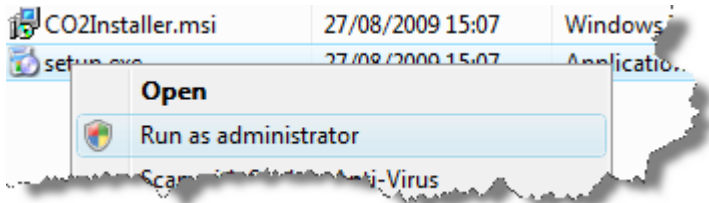

Insert the Carbon Calculator CD into your CD drive.

Right click the "Computer" or "My Computer" icon and select "Explore".

Navigate to your CD drive, you **will** now be able to see 2 files on your CD drive :-

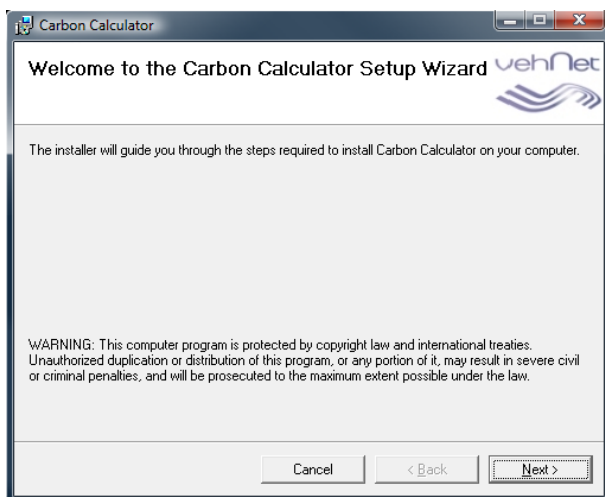

Double click on the **Setup.exe** application. Please note that on Windows Vista you may have to right click on the icon and choose "Run as administrator"

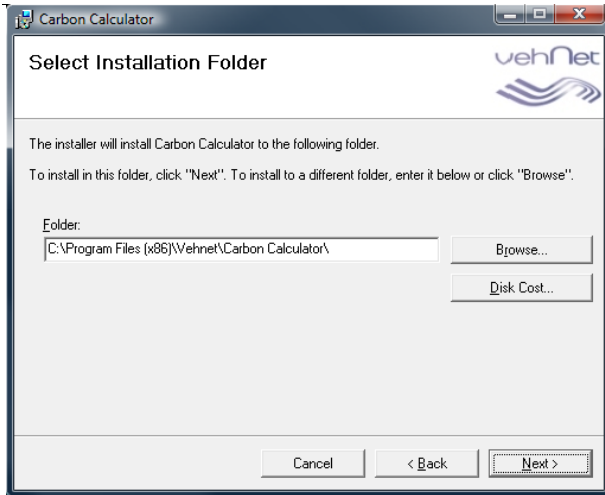

1.2 Carbon Calculator Installation

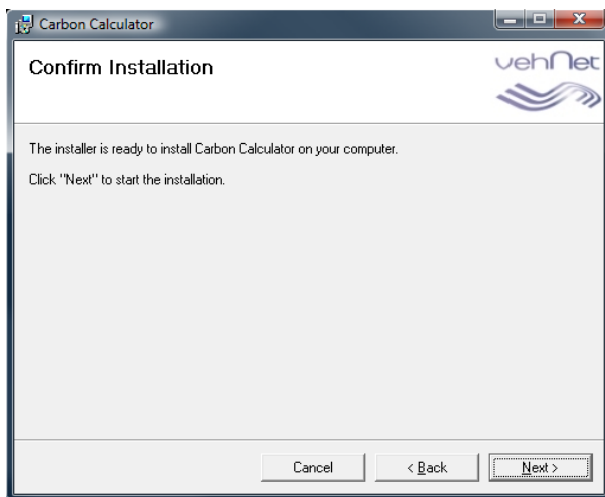

1.2.1 Carbon Calculator Software Installation

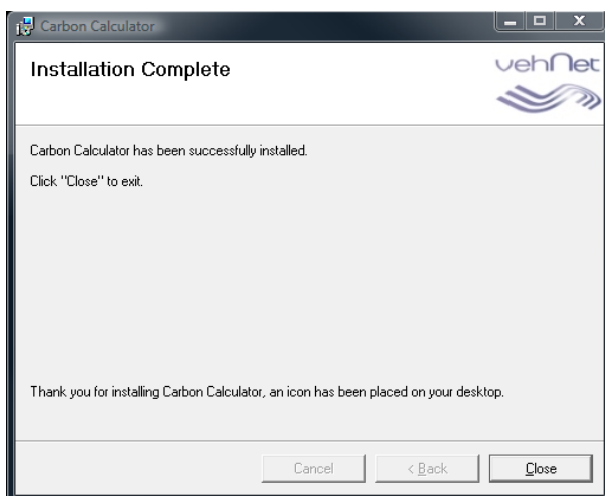

Click **Next** to continue the installation

Enter the path where you want to install Carbon Calculator and then click **Next**.

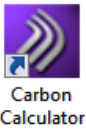

Click **Next** to begin the installation process and wait for it to complete.

Once installation has finished please click **Close**.

Carbon Calculator has now been installed on your computer and a shortcut has been placed on your desktop:

And Start Menu Items have been installed under **Start > Programs > Vehnet >Carbon Calculator**

2 Registration Process

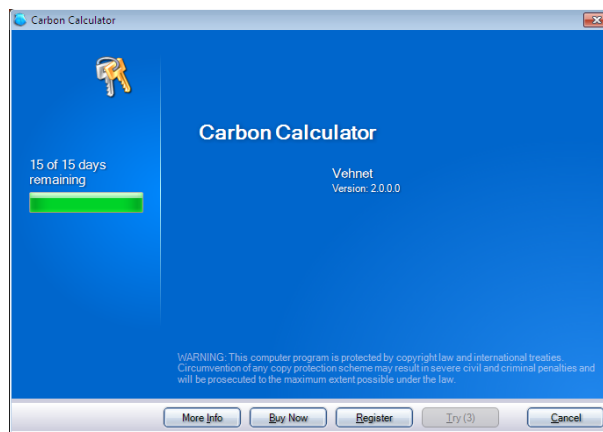

The Carbon Calculator application can be evaluated for a trial period of 14 days. After this time a License and Support packaged must be purchased. For ECG Members this is a small annual fee, please contact the ECG for details. For non-ECG members you will be required to purchase the software in addition to paying an annual fee, again please contact the ECG for purchase pricing. After your purchase of a Support and License packaged has been processed you will be emailed you account details to the Vehnet E-Licensing Portal. Inside the Vehnet E-Licensing Portal you will find a serial number for the CO2 product, this is your key to unlock the product from its trial mode.

Step 1: Login to the Vehnet E-Licensing Portal and make a note of your serial number.

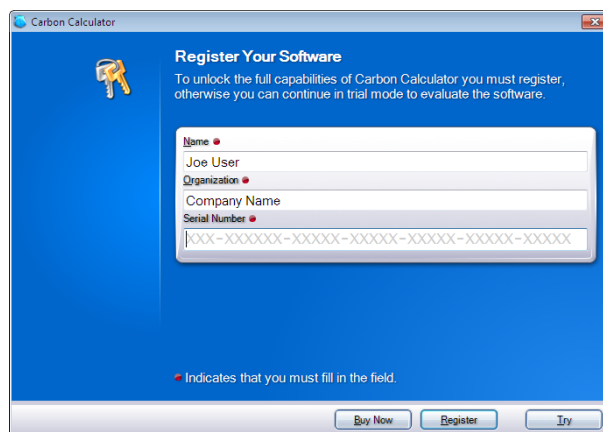

<http://tracks.vehnet.com/elicensing>

Step 2: Start the Carbon Calculator Application

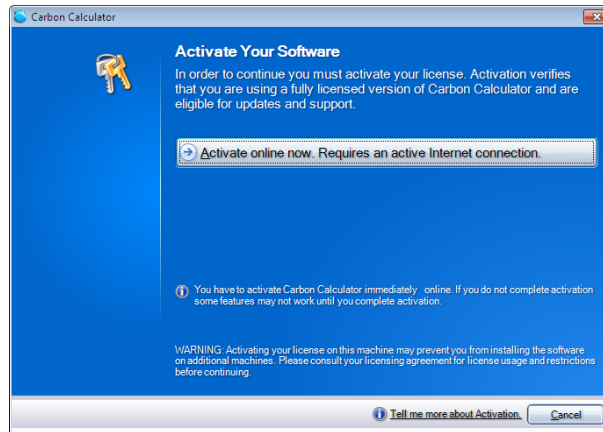

Step 3: At the following screen click on the “Register” button.

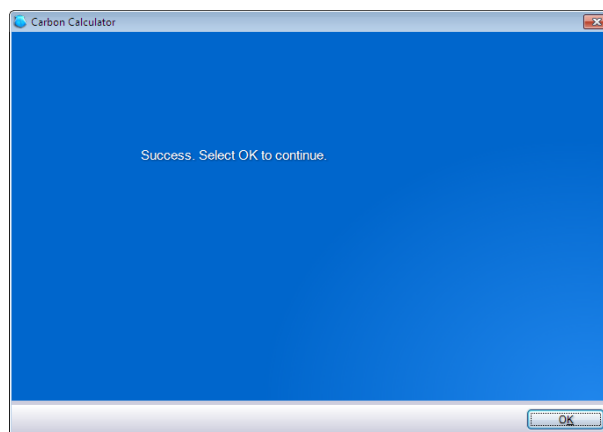

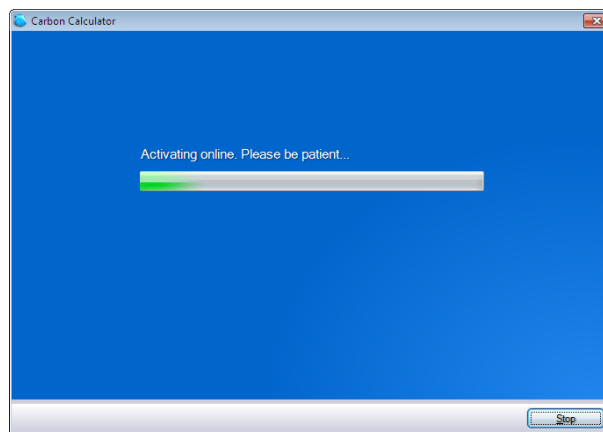

Step 4: Enter your name, company details and then the serial number obtained in step 1.

Step 5: You will need to be connected to the internet so the serial number can be validated by the Vehnet Licensing Server. Once online click on the Activate online now button.

Step 6: After a short while the software should report it has been activated successfully. After clicking ok the application will launch and you will not be prompted to activate again.

3 Uninstalling Carbon Calculator

To uninstall Carbon Calculator Click **Start > Control Panel**

Windows XP:

Click on Add / Remove Programs

Windows Vista:

Click "Uninstall a program" under the programs section (or if in Classic View open "Programs and Features")

Select Carbon Calculator from the list of installed programs and then click "Uninstall". Carbon Calculator will now be removed from your computer.

Please note: Some residual files may be left in the program installation folder (By default this is c:\program files\Vehnet\Carbon Calculator). These are the Access database containing any CO2 information you imported and some XML files. These can be safely deleted if required.
