**The Association of European Vehicle Logistics**

Digitalisation Working Group

Michael Bünning

Ship   Train   Compound   Truck   Barge

Digitalisation WG (DWG) structure

Digitalisation Working Group

Other projects:
e-gate
e-documents
e-damage
etc.

Close range vehicle ID
(to be convened)

ECG-VDA Joint meeting

VDA Finished Vehicle Logistics Digitalization WG

Use-case group 1: Overall transparency

Use-case group 2: Services on demand

Use-case group 3: ETA; advanced transport notice

Use-case group 4: Geoposition & reducing scanning

New structure

- The DWG had initially three sub-groups (Telematics, e-Gate, e-documents), of which the only active group was Telematics

- The Telematics sub-group's main activity has become the co-operation with the VDA

- It was decided to integrate all three sub-group topics into the main DWG

- DWG webinar to be organised on 5 June

Ship Train Compound Truck Barge
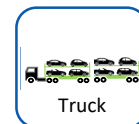

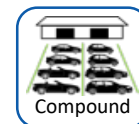

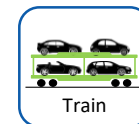

ECG-VDA Joint meeting

- Co-operation with the VDA WG Connected Vehicle re. the communication within the supply chain

- 4 use-case groups established till the end of the year
  - VDA and non-VDA OEMs, as well as LSPs collaborate
  - Field tests also included
  - Results to be presented at the ECG Conference (October 2018) and the Odette Conference (November 2018)
  - Recommendations to be drafted early 2019

# Close range vehicle identification

- Proposal for a new sub-group on close range vehicle ID

- Objectives:
  - Study and recommendations on technology
  - Content of the vehicle ID
 - Location of ID within the vehicle
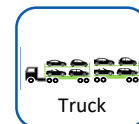

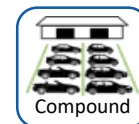

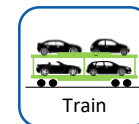

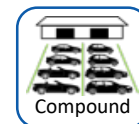

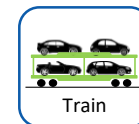

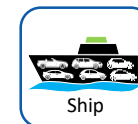

DWG topics – e-gate

- ECG decided to approach ERTICO (European Intelligent Transport organisation) which has a relevant project

- ERTICO's AEOLIX project (Architecture for European LOgistics Information eXchange) covers issues that seem to be similar to the objectives of this sub-group

- Szilvi Kiss will join a meeting in Trieste at the end of June
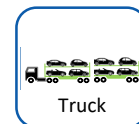

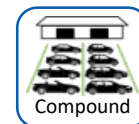

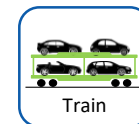

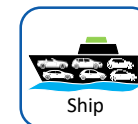

DWG topics – e-gate

- ERTICO's AEOLIX project:

    - EU-funded project
    - Living Lab
    - Gothenburg

Ship   Train   Compound   Truck   Barge
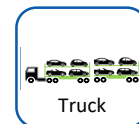

DWG topics – e-documents

- ECG published a joint statement with IRU on e-CMR in January 2017

- Since then other organisations, bigger than ECG have taken the lead on the issue so this sub-group is on hold

- ECG is just monitoring the developments now as the European Commission has included this in the Mobility Package

- Michael Bünning will still raise this issue in Berlin as Germany is our top priority

Ship Train Compound Truck Barge
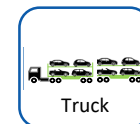

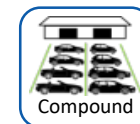

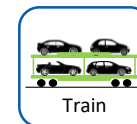

DWG topics – e-documents

- Other issues to be included under this umbrella:
  - e-damage reporting will also be discussed
