

COVID-19

Best Practice for truck drivers

ECG

The Association
of European
Vehicle Logistics

You should carry
disinfectant, rubber
gloves and face masks

Disinfect your hands
every time you enter or
exit the vehicle

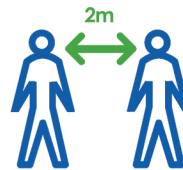

Rubber gloves must be
worn while on the
premises and when
moving the truck
and/or vehicles

Keep the driver's cabin
clean and ventilate
regularly

No handshakes or other
physical contact

Always keep a distance
of 2m from others

Transportation
documents should be
signed using your own
pen

Avoid entering closed
spaces where it is not
necessary

Always be informed in
advance of specific local
guidelines issued for the
locations you are going
to, e.g. masks required

If you or a family
member have a fever
or other virus symptoms
inform your manager
and stay home
