Remark: Prior to 2022, all JAIF and Odette messages have been developed according to Version 3 of ISO 9735 "EDIFACT Application Level Syntax Rules" but from May 2022 the only valid version of ISO 9735 is Version 4 and all UN/EDIFACT based messages must conform to this version.

JAIF and Odette recommend the application of ISO 9735 Version 4 Part 11 which allows the creation of a payload compliant to Version 3 and requires only minimal amendments in service segments.

For further details, please refer to Odette document OS11, "Structure of an EDIFACT Interchange".

3232	Second related location name	C an..70	N	not used
5479	Relation code	C an..3	N	not used

Remark: The LOC segment is used to identify:

- level 2 - a distinct area within level 1 (compound)
- level 3 - a distinct area within level 2

Either this segment is used and vehicles details are grouped by location area or, alternatively, the LOC in SG12 is used and vehicle details can be transmitted without being grouped by location.

No = Consecutive segment number | MaxOcc = Maximum occurrence of the segment/group | St = Status
