ECG TECH BOARD

Identify industry tech challenges
and facilitate the uptake
of solutions to answer them

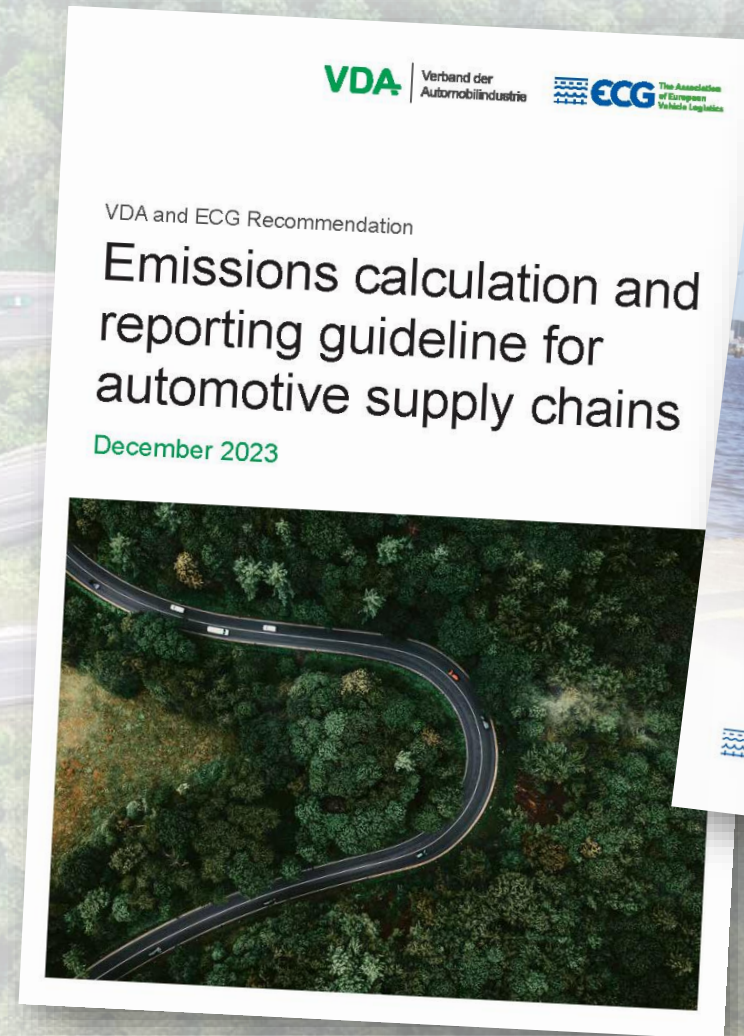

Ensure buy-in from the
whole sector

OEM-LSP-IT company
collaboration

New direction to the
Digitalisation WG

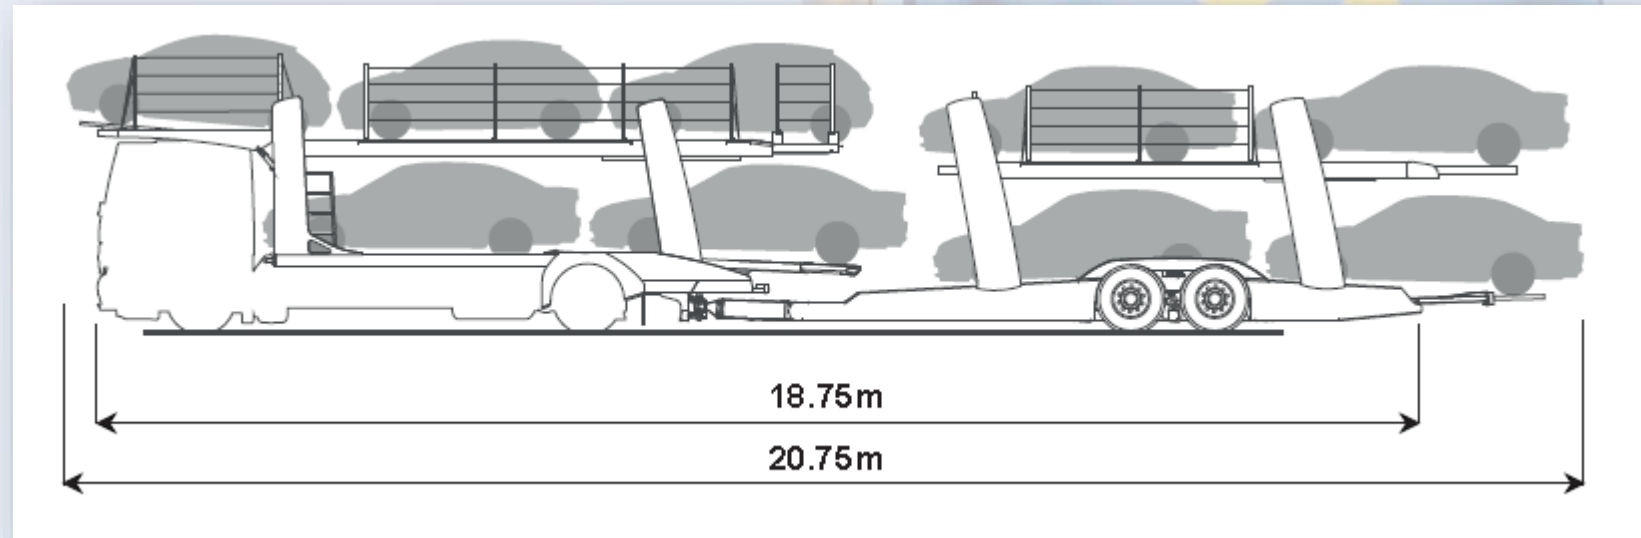

Emissions standardisation

Phase 2 will be about implementation

Lobbying campaign on loaded length

Proposal to revise
the Weights &
Dimensions
Directive includes
harmonisation for
vehicle transporters

Harmonising loaded length
to at least 20.75m

European Parliament elections:

6-9 June 2024

New CO2 road tax in Germany.

[Home](#) > [New CO2 road tax...](#)

In August ECG – The Association of European Vehicle Logistics has published a briefing paper on the substantial new CO2 tax proposed by the federal government to be included in Germany's road tolls from **1 December 2023**.

We would like to inform you that on 20 October the German Parliament has passed the law on the introduction of the new CO2 tax as proposed by the federal government and confirmed the entry into force from 1 December 2023.

We invite you to read our [paper](#) which we published in August 2023 and updated now to reflect the fact that the CO2 emissions tax is confirmed. The paper provides a summary of the proposed changes to road tolls (Lkw-MAUT) and, specifically, on the introduction of a CO2 emissions tax. The purpose is to inform ECG members and other actors in the vehicle logistics sector about these changes. As a result of the proposed legislation governing road tolls in Germany, road taxes will increase significantly for logistics companies operating in Germany, or transiting the country, starting from 1 December 2023.

New CO2 tax to be included in Germany's road tolls.

Operational costs to increase dramatically for Logistics Service Providers from 1 December 2023

October 2023 Update
