

ECG Survey has gone digital!

Advert opportunities

ECG Survey has changed!

- It has gone digital!
- [New website](#) available from October 2023
- Continuous update will be provided from now on, instead of the biannual one
- Forecasting data from S&P Global Mobility updated every 6 months
- Statistical data, country maps (including OEM plants and member compounds) and member company profiles are available as it was with the book!

Welcome to the ECG Survey website

This website is the digital version of ECG's long-standing bi-annual publication: the Survey of Vehicle Logistics in Europe. This has been a unique scientific publication produced by ECG every two years, encompassing global and European data on the automotive industry in general, and the Finished Vehicle Logistics sector in particular.

In 2023 ECG decided to digitize this publication to reply to the needs from its members. The content is therefore now accessible on a website platform. It contains industry statistics coming mainly from ACEA as well ECG member compounds details and member company profiles. The member data is amended occasionally and a regular update is foreseen every year from now on. The production, sales inward and outward flow data is kindly provided to us by S&P Global Mobility two times per year.

[What is the ECG Survey?](#)

Industry statistics

The main figures for the automotive industry, ranging from vehicle production and registration, through the specific figures on Alternative Fuel Vehicles and vehicle emissions to the age of the vehicle park and vehicle import-export figures.

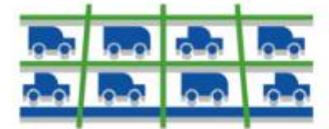

Country data

Information in a country-level breakdown with data on the followings: member company port and inland compounds, car, truck, bus and High & Heavy manufacturing sites, as well as forecasting information.

ECG Members

The detailed profile of all our member companies, their services and locations.

Member locations

In this section you will be able to explore, search and sort the inland and port compound facilities using several criteria like country, company, services...
