Highlevel concept of training LLMs for specfic contexts

Use Case

Today LSPs receive hundreds or even thousands of emails per day:

- Some are automatically generated and contain EXCEL-sheets that need to be uploaded or filled in and sent back
- Some are generated by a user and may contain more specific requests and custom-formatted EXCEL-sheets
- Some are text-based requests to get information or take certain actions

Issues

- This creates lots of work
- Time between sending email and receiving an answer is comparably long, leading to frequent task switches for all involved employees

Use Case: Examples of e-mail requests

Morning All,			Qashqai – 306964
Can we please arrange a	D2D for the below?		Hi Guys,
VIN	Location Name	New Location	
VSSZZZKN5RW001602	Albert Berry Motors Ltd (DI R00891)	Connollys SEAT Sligo (DLR00938)	Can you grab this in Tullamore Nissan and deliver to Naas Nissa

Original Request

Qashqai - 306964

Hi Guys,

Can you grab this in Tullamore Nissan and deliver to Naas Nissan.

Please charge Naas Nissan.

Thanks,

Al generated answer

Dear ***,

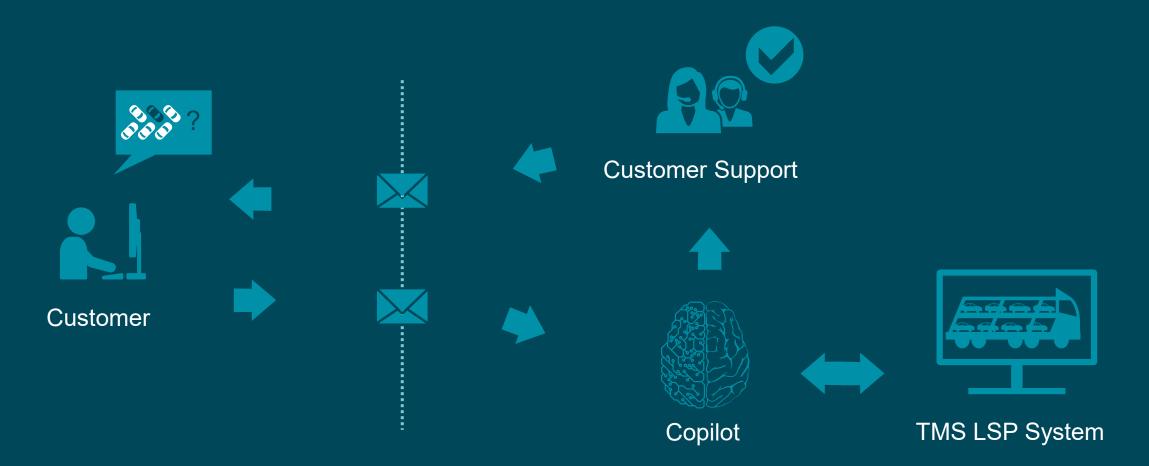

We have received your request to transport the Nissan Qashqai with VIN SJNTBAJ12U1306964 from Tullamore Nissan to Naas Nissan. The order has been created, and the transportation cost will be 150.

Please let us know if you need any further assistance.

Best regards, Customer Support National Vehicle Distribution

Result: The request was processed automatically. No manual typing. No follow-up questions.

What does the process look like?

Hi John!

I'm here to assist you with your customer requests. Paste the request you've received and I will help you.
