Sino-European vehicle logistics pact

The Association of European Vehicle Logistics (ECG) and the China Automotive Logistics Association (Cala) have signed a strategic agreement to strengthen international collaboration in finished vehicle logistics.

Signed in Shanghai, the agreement aims to promote efficiency, quality and best practices between the European and Chinese automotive logistics sectors, as the companies have reported.

The ECG will share its operational and quality manuals, support knowledge exchange and the development of international logistics frameworks. Further dialogue is expected at ECG's annual conference in Amsterdam in October 2025. (js)
